

What is claimed is:

1. A unified strip/cleaning apparatus, comprising:
a strip line for removing a resin on a substrate; and
5 a cleaning line disposed below the strip line to clean and dry the substrate.
2. The strip/cleaning apparatus of claim 1, wherein:
an isopropyl alcohol (IPA) injecting module is provided in
10 the strip line to remove a stripper injected for removing the resin.
3. The strip/cleaning apparatus of claim 2, wherein:
an elevator is provided for conveying the substrate carried
15 from the IPA injecting module into the cleaning line disposed therebelow.
4. The strip/cleaning apparatus of claim 1, wherein:
a loader is provided for supplying the substrate to the
20 strip line; and
an unloader is provided for receiving the substrate from the cleaning line.
5. The strip/cleaning apparatus as claimed in claim 1, wherein
25 said strip line includes:

a first strip module for supplying a stripper to the substrate received from the loader to primarily remove the resin from the substrate;

a second strip module for secondarily and physically
5 removing the resin; and

a third strip module for injecting the stripper onto the substrate at a high pressure to completely remove residual resin on the substrate.

10 6. The strip/cleaning apparatus as claimed in claim 3, wherein said cleaning line includes:

a first cleaning module for supplying a cleaning liquid onto the substrate received from the elevator to primarily clean the substrate utilizing a pipe shower;

15 a second cleaning module for injecting the cleaning liquid onto the substrate at a high pressure to secondarily clean the substrate; and

a dry module for drying the substrate having a residual cleaning liquid.
